RAeS Bristol Branch present....

A Christmas Lecture

for all the family

Engineering Magic

by

Professor Jon Holt, Scarecrow Consulting

Join engineer and award winning author Professor Jon Holt, AKA the 'Engineer in the Hat,' for a magical evening of Science, Technology, Engineering and Mathematics.

In this family lecture, he will explore the power of numbers; the impact that they have on our everyday lives; and why they are so important for STEM. Learn how we can use numbers to predict the future, read minds and influence our lives. Explore how we can also use numbers for the greater good and the not-so-greater good!

Expect an evening of wonder with plenty of audience participation, terrible jokes, a bed-time story and some mind-blowing magic.

This exciting and interactive lecture is the perfect mix of educational and fun and will interest and inspire adults and children alike, so please bring the family along!

Time and Venue

6.30pm – Thursday 13th December 2018

Bristol Business School, X-Block, University of the West of England

Members and non-members welcome!
